

Wishing You Were Here Fishing Report April 14, 2003

Hello Folks. This past week has been absolutely fantastic! Conditions in all of the rivers we are guiding on are excellent. The fish are biting and are BIG! The long-term weather forecast is favorable. We are now on the river every day for the next three weeks. If mother nature continues with these great conditions, all of the guests that we have coming during the next few weeks are in for a treat. I think that the picture of the week will tell you how good the Steelheading can be at this time of year. For more confirmation have a look at a copy of the latest *Salmon Trout Steelheader Magazine* starting on page 62. I think the picture of Rob's fish can finish off this weeks report. Tight Lines!!

Rob landed this hog on the Kitimat on Friday. He still hasn't quit talking about it! This could be you!
